

**BOARD OF EDUCATION
LONG BEACH UNIFIED SCHOOL DISTRICT**

SUBJECT: Technology Master Plan Enclosures: None

CATEGORY: New Business Reason for Board
Consideration: Information/Action
Date: May 19, 2009

BACKGROUND

In November 2007, the Long Beach Unified School District began a comprehensive process to determine how technology can systematically enhance teaching and learning as well as support administrative functions. Over the next 18 months, this process involved a districtwide committee of approximately 150 stakeholders, including teachers, classified staff, and administrators from both the Central Office and schools. It also encompassed a needs assessment survey and a technology inventory that covered over 20,000 workstations and other equipment. The entire interactive effort led to the development of a Technology Master Plan.

This Plan outlines key goals, objectives, and processes to ensure that all students and staff members benefit from technology. It is aligned with both the LBUSD Strategic Plan and the School Building Plan.

RECOMMENDATION

Adopt the Technology Master Plan.

Approved and recommended:

Christopher J. Steinhauser
Superintendent of Schools
