Basic Math Facts and Math Application Guidelines

Math Application skills have been added to the Basic Math Facts Assessment.

For a student to be considered **Advanced Proficient** the student must:

- complete the math facts 70 question test in less than five minutes
- get 97% correct on the math facts test (miss only two)
- take the **un-timed** math application test for each operation and work at least 4 of 5 correctly. Students must show their work to get credit.

If the student does not meet all three requirements for **Advanced Proficient**, then the highest level a student can attain is **Proficient**.

| Proficiency Level | Percent | # Correct out of 70 | Time | Math Application No Time Limit |
|----------------------------|----------|---------------------|----------------|--------------------------------|
| Advanced Proficient | 97% | 68 - 70 | ≤ 5 min. | 4 of 5 correct |
| Proficient | 93% | 65 - 67 | ≤ 10 min. | Any # correct |
| Partial Proficient | 90% | 63 - 64 | ≤ 15 min. | Do not take |
| Not Proficient | $< 90\%$ | < 63 | Any time | Do not take |
