IPM Statement

It is the goal of the Long Beach Unified School District to implement IPM by focusing on long-term prevention or suppression of pests through accurate pest identification, by frequent monitoring for pest presence, by applying appropriate action levels, and by making the habitat less conducive to pests using sanitation and mechanical and physical controls. Pesticides that are effective will be used in a manner that minimizes risks to people, property, and the environment, and only after other options have been shown ineffective.

Pest management objectives

Recognizing that the health and safety of students and staff is our first priority, our objective is to focus on long-term pest prevention in order to maintain a safe and productive learning environment for all. Pest management will be achieved by following integrated pest management procedures which call for the most appropriate and least-hazardous method of control. Effective sanitation shall be enforced and buildings regularly cleaned and repaired in order to prevent infestations, minimize the use of pesticides, and eliminate the need for routine applications.

✓	Prior to entering into a contract, the school district has confirmed that the pest control business understand the training and requirement and other requirements of the Healthy Schools Act.

Pest Identification, Monitoring, and Inspection

- Pest identification is done by: LBUSD Pest Control, LB Health Dept., LA County Greater Vector Control, LA County Health Department, and Target Specialty Products.
- Monitoring and inspecting for pests and conditions that lead to problems are done regularly by: LBUSD Grounds Dept., Custodial Services, Maintenance, and Pest Control staff and results are communicated to the IPM Coordinator.
- Specific information about monitoring and inspecting for pests, such as locations, times, or techniques include:
 - Site reports area of concern via the work order system.
 - Area reported is inspected to determine the routes of entry and the threshold level of pests
 - Plan for taking care of the concern is developed
 - Grounds, custodial, and maintenance staff will begin exclusion activities and pest monitoring tools and apply non-toxic products if necessary

Pests and Non-Chemical Management Practices

This school district has identified the following pests and routinely uses the following non-chemical practices to prevent pests from reaching the action level.

Pest	Remove Food	Fix leaks	Seal cracks	Install barriers	Physical removal	Traps	Manage irrigation	Other
Roaches	✓	✓	✓	✓	✓	✓		Seal openings, cracks and crevices
Mice	✓	✓	✓	✓	✓	✓		Repair faulty plumbing. Seal electrical conduit and open outlets. Seal openings larger than ¼ inch.
Rats	✓	✓	✓	✓	✓	✓		Repair faulty plumbing. Seal electrical conduit and open outlets. Seal openings larger than ¼ inch.
Ants	✓	✓	✓	✓	✓		✓	Avoid excessively dry or soggy turf. Trim overgrown trees and shrubbery. Remove trees and shrubbery infested with pests.
Termite		✓		✓	✓		✓	Remove and replace any wood members infested with termites whenever possible and economically feasible.
Unwanted vegetation					✓		✓	Implement use of weed cloth and much where applicable

Chemical Pest Management Practices

If non-chemical methods are ineffective, the school district will consider pesticide use only after careful monitoring indicates that they are needed according to pre-established action levels and will use pesticides that pose the least possible hazard and are effective in a manner that minimizes risks to people, property, and the environment.

This school district expects the following pesticide (pesticide products and active ingredients) to be applied during the year. This list includes pesticides that will be applied by school district staff or licensed pest control businesses.
